EXPERIENCE

Project Scholar

Aug 2025

PET Saúde - Universidade de Brasília (UNB) - Brazil, Brasília

Participated in infrastructure and website maintenance activities, ensuring availability, organization, and usability. Developed chatbots to improve user communication, enhancing service quality and access to information. Adapted and improved interfaces based on [GOV.BR](#) standards, with a focus on digital accessibility and support for users with navigation difficulties. Collaborated on technical improvements aimed at user experience (UX) and digital inclusion. Contributed to the PET-Saúde project, focusing on digital solutions to support communication and accessibility in healthcare services.

Project Scholar

Dec 2024 — Dec 2025

PGFN - Universidade de Brasília (UNB) - Brazil, Brasília

Developed and maintained Python scripts for institutional data web scraping. Conducted daily monitoring of code execution, identifying, analyzing, and resolving operational issues. Implemented performance optimizations in scraping processes to enhance efficiency and stability. Contributed to the development of information security solution prototypes, focusing on the protection of sensitive institutional data. Prepared technical reports and communicated incidents and improvements to the project team. Participated in a remote project at the Office of the Attorney General of the National Treasury (PGFN) in partnership with the University of Brasília.
